KENNETH MARC B. BALASTA

QA AUTOMATION ENGINEER | PLAYWRIGHT | TYPESCRIPT

kmarcbal@gmail.com | 0976-436-3893 | Taguig, Metro Manila, Philippines | github.com/Kenmbal

QA Engineer with hands-on experience in Playwright/TypeScript test automation, CI/CD integration, and regression and load testing across web, mobile, and browser-extension products. Skilled in Jira, Trello, and Azure DevOps for defect and sprint tracking. Cut manual regression effort by 40% through automation and structured defect triage.

WORK EXPERIENCE

QA Tester | ClawGTM & Travel Arrow **Mar 2026 – Oct 2026**

Contract | *Remote*

ClawGTM (Consumer App)

- Wrote and maintained test cases and bug reports for the consumer app, documenting reproducible steps for developers.
- Performed sanity testing on new features before release to confirm core flows worked.
- Automated a transactional test flow using Playwright/TypeScript, reducing manual testing effort for that flow by about 10–20%.
- Triaged defects with engineering, prioritizing 30+ reproducible bugs and 10+ UX findings.

Travel Arrow (Chrome Extension)

- Executed 80+ manual regression test cases per build for Chrome extension releases, validating pre-release functionality and stability.
- Diagnosed and documented reproducible defects and UX gaps in partnership with developers, driving fix turnaround.
- Validated extension builds against version-compatibility requirements, reducing post-release defect leakage.

QA Tester | OnlineJobs.ph **Jan 2026 – Feb 2026**

Part-time | *Remote*

- Performed manual and exploratory testing on a sneaker e-commerce mobile app, isolating critical edge-case defects and delivering UI/UX recommendations.
- Participated in synchronized load testing with a cross-functional QA team on a high-traffic dating platform, helping identify performance bottlenecks under peak load.
- Ran manual, exploratory, functional, and regression testing for XSplit Beta/Live and a Bug Mart e-commerce site, producing structured bug reports across full test cycles.

Quality Assurance Associate | Raykan Technologies **Nov 2025 – Feb 2026**

Internship | *Remote*

- Built a Playwright (TypeScript) automation framework from scratch using Page Object Model (POM), covering 80+ test cases and cutting manual regression effort by 40% across mission-critical modules.
- Integrated the Playwright automation suite into GitHub Actions CI/CD pipelines, enabling automated regression runs on every build.
- Ran JMeter load testing across 34 API endpoints at 100 concurrent users, isolating performance bottlenecks ahead of production release.
- Validated tickets in Azure DevOps as part of the QA team, moving items to QA Passed after manual, exploratory, API, and network-level testing, improving defect-report accuracy.

TECHNICAL SKILLS

Automation & Testing: Playwright, TypeScript, Page Object Model, API Testing, JMeter, BlazeMeter, Selenium (basic), Postman (basic)
CI/CD & Version Control: GitHub Actions, Git
Project & Defect Tracking: Jira, Trello, Azure DevOps
Methodologies: Agile, Scrum
Languages: JavaScript, TypeScript, Python, SQL (basic), HTML, CSS
QA Practice: Manual, Exploratory & Regression Testing, Smoke & Sanity Testing, Load Testing, Defect Triage, Test Case Design

EDUCATION

B.S. Computer Science — Bicol University Polangui Campus **Aug 2022 – Jun 2026**
